**Comment:** Since the electric current will be supplied from power stations located in the border area, there is still uncertainty as to whether or not Poland will have to pay for it on a barter basis.)

3. Imports from Poland into the Soviet Zone of Germany, in insofar as a definite agreement has been reached, amount to \$50,320,000. Where no values have been indicated, proposals of the DWK are still under consideration. The following items will be imported:

**Comment:** Poland had offered to deliver up to three million tons of hard coal, but since the DWK was unable to offer in exchange a sufficient quantity of goods from the eastern zone of Germany, the quantity had to be cut to 1.5 million tons. Well-informed persons doubt that Poland will be able to deliver 500,000 tons of coke as agreed, since this amount is almost three times as high as provided for in the agreement for 1948. The lignite from Silesia will be processed in the eastern zone of Germany at approximately 100 percent profit.)
